

Ultra-Drain Guard® - Adjustable Frame Model

Protect the water system from Oil, Sediment and Pollutants with Ultra-Drain Guard® catch basin filter

The Ultra-Drain Guard® is engineered to filter stormwater before it becomes a problem in the water system. As a storm drain filter, it removes contaminants like oil, litter and sand from stormwater flow. Its geotextile fabric and easy installation make it ideal for industrial facilities, gas stations, construction sites, and parking lots where stormwater runoff is likely to carry oil, eroded soil, debris, and fuel contaminants from cars.

- ✚ Ultra-Drain Guard® stays in place even with grate removed
- ✚ Adjustable catch basin insert quickly re-sizes to fit almost any storm drain – no trimming of excess fabric required.
- ✚ Steel frame adjusts and keeps Ultra-Drain Guard® in place – preventing it from falling into the basin even when the grate is lifted.
- ✚ Heavy-duty hook-and-loop fasteners around the perimeter of the Ultra-Drain Guard® skirt keeps it secured to the frame.
- ✚ Quick and clean installation – no measuring or trimming required.
- ✚ Steel frame can be reused - Replacement Filter Fabric available and is quickly and easily installed.
- ✚ Helps comply with Environmental Regulations

Model	Oil Capture	Sediment Capture	Flow Rate	Dimensions	Material
Adjustable Frame	4,5l	20kg	100m ³ /h	40x50cm–60x90cm	Polypropylene
